NIH PAIN
SPECIAL INTEREST GROUP

For more info, see nccih.nih.gov/research/intramural/sig

Cortical enhancement of pain and anxiety

Min Zhuo, Ph.D.
Professor Neuroscience
Department of Physiology
University of Toronto

Pain in the brain as studied by recordings from the human brain during awake surgeries

Frederick Lenz, M.D., Ph.D., FRCS(C)
A Earl Walker Professor, Director of Functional Neurosurgery
Professor of Neurosurgery
Professor of Neuroscience and BME
The John Hopkins University School of Medicine

Pain control by inflammation and non-neuronal cells

Ru-Rong Ji, Ph.D.
Professor of Anesthesiology and Neurobiology
Chief of Pain Research
Duke University Medical Center

Cerebral mechanisms of pain avoidance learning

Mathieu Roy, Ph.D.
Assistant Professor
Department of Psychology
McGill University

Understanding pain in the brain: top-down versus bottom up

Ben Seymour, Ph.D.
Wellcome Intermediate Fellow
Computational and Biological Learning Lab, Cambridge University
Principal Investigator
Center for Information and Neural Networks (CiNet), Osaka, Japan

Using C. elegans to study the effects of bioactive lipids in sensory ion channels

Valeria Vásquez, Ph.D.
Assistant Professor
Department of Physiology
The University of Tennessee Health Science Center
